- 5. How the groups work
- 6. Introduction of the new members of the movement
- 7. How you can join the movement
- 8. The new members tell their own experiences
- 9. Meals and music

### **The programmes**

The movement builds itself in the streets. They are its reason. After some month of self-consciousness and formation and of general activities decided all together ( e.g. the house cleaning, the self cleaning, sports, plays, discussions on precise subjects, self-help organisation, self-belief reinforcement), the girls and the boys can participate to the training programmes of the house if they like them.

### *The girls training*

It is about the self-management and the dignity of women in a “machos” society.

### *The boys training (to help them to ameliorate their life)*

Education: the aim is all the street children could finish their primary schools, having the possibility to attend the secondary education and even to go to University.

Professional training (in the house or outside) to find soon a job and to become an artisan so that they can have an independent life.

The starting of a new life: the aim is to help the youngsters who decide to leave the streets (finding a flat, a job, being psychologically helped).
